DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 08/09/04 was filed after the mailing date of the allowance on 06/08/04. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

Claims 13-14 and 22 are allowed.

The following is an examiner's statement of reasons for allowance: The examiner has reviewed the information disclosure statement (IDS) prior art in light of applicant's claimed invention and finds that the claims define over the IDS prior art. The IDS prior art does not disclose or suggest inter alia the limitations of an apparatus for controlling an optical wavelength of a control target light outputted from a variable wavelength light source, comprising: an optical diffraction means for diffracting the control target light entered from the variable wavelength light source into a direction corresponding to the optical wavelength of the control target light; a periodic signal generation means for detecting a diffraction light diffracted by the optical diffraction unit means and generating periodic signals with a phase

varied according to a diffraction direction of the diffraction light; and a phase detection means for detecting a phase difference between a phase of the periodic signals and a phase corresponding to a reference optical wavelength, and controlling the variable wavelength light source by feeding back the phase difference to the variable wavelength light source such that the optical wavelength of the control target light is controlled by an optical frequency pulling with respect to the reference optical wavelength according to the phase difference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
